Normal Operations

National Test of the Wireless Emergency Alert (WEA) and Emergency Alert System (EAS)

On 10/03/18, the Federal Emergency Management Agency (FEMA), in coordination with the Federal Communications Commission (FCC), will conduct a nationwide test of the Emergency Alert System (EAS) and Wireless Emergency Alerts (WEA).

- The test will assess the operational readiness of the infrastructure for distribution of a national message and determine whether improvements are needed.
- At 1118 hours, the WEA test message will be sent to cell phones that are connected to wireless providers participating in WEA.
- At 1120 hours, the EAS message will be sent. EAS is a national public warning system that provides the President with the communications capability to address the nation during a national emergency. The test is made available to EAS participants (i.e., radio and television broadcasters, cable systems, satellite radio and television providers, and wireline video providers) and is scheduled to last approximately one minute.

Emergency Management Assistance Compact (EMAC) resources provided by Cal OES

In support of Hurricane Florence, Cal OES provided resources to the States of Virginia and South Carolina under the Emergency Management Assistance Compact (EMAC). Below are the corresponding mission numbers:

- 2018-SOC-51783: Cal OES personnel providing State EOC support
- 2018-SOC-51801: Santa Clara County to provide Local EOC support in North Carolina
- 2018-SOC-51804: San Francisco to provide Local EOC support in North Carolina
- 2018-SOC-51829: San Joaquin and Stanislaus Counties to provide Mental Health support at shelters in North Carolina
- 2018-SOC-51825: Department of Social Services to provide FAST Teams to North Carolina

Cal OES continues to work with the impacted states to determine additional resource needs.

WEATHER SYNOPSIS BY REGION

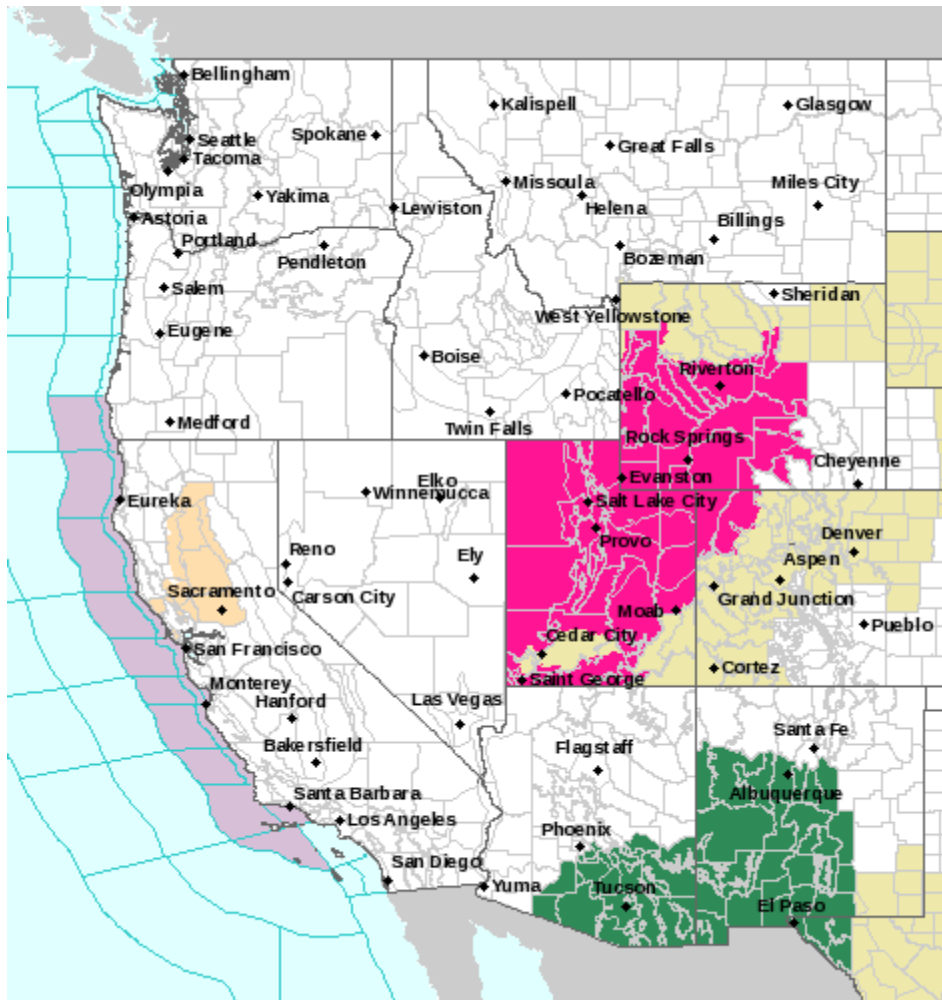

NORTHERN CALIFORNIA

- Gusty Northerly winds and Drier airmass tonight through Thursday morning.
- First Pacific trough or wave moves over the area today and tonight, with 2nd trough passage weekend into early following week.
- Main fire weather effect during this period will be gusty wind.
- Slight increase in wind today (gusts 20-25 mph, locally up to 30 mph) over the mountains and near the Oregon (OR) border with a general W-NW flow although N-NE-NW near OR border.
- Gusty Northerly wind impacting more of the Region tonight through tomorrow night with lasting effects well into Thursday, general gusts 20-25 mph but locally up to 30 mph.
- Sacramento Valley and Foothills will be favored for the gusty Northerly wind tomorrow - tomorrow night but some stronger gusts also should affect the higher ridges of Napa county tomorrow night.
- Relative humidity (RH) will lower starting tonight and last through Thursday, teens and even some single digits possible tomorrow and Thursday afternoons combined with worsening recoveries at night, gradual rising trend thereafter.
- Fluctuating temperatures with near to below normal readings today, trending warming most areas, especially Sacramento Valley, latter half of the week before cooling during the weekend. Warmest days Thursday and Friday.
- Increasing W-SW wind Friday and lasting into the weekend, possible dry Northerly wind event following Trough passage earlier half of next week.
- Meaningful precipitation not likely next 7 days.

SOUTHERN CALIFORNIA

- A trough will bring breezy and cooler weather to the area today, but a warming trend is expected during the second half of the week.
- Southwest winds of 15-25 mph with gusts to 40 mph will occur in and near the Antelope Valley and Banning Pass today.
- North winds of 20-30 mph tonight into tomorrow near the I-5 Corridor.
- Temperatures will be below normal today with highs in the 70s in the mountains to the 80s in the valleys. Look for temperatures to reach the lower to mid 90s in the valleys Thursday and Friday before temperatures cool off a few degrees over the weekend.
- Minimum RH will be in the 8-12% range today through Friday above 4,000 feet. Fair recovery is expected tonight.
- No shower or thunderstorm activity is expected across the region through the forecast period.
